Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 48,52-54,57,58,62,63,66 and 67 are rejected under 35 U.S.C. 102(b) as being anticipated by Mollenauer, et al.-6077277.

Mollenauer discloses a device having a means for advancing suture 8,9, a straightening means 2,11, a grasping means 5,6 and an opening in the grasping means (space between the two jaws when not completely closed). If the jaws were closed upon tissue such that the tissue were held tight but the jaws were not completely closed leaving a space between the jaws, the advancing means could carry suture 45,48 through the opening in the grasping means and through tissue to a position distally of the jaws. The prior art device could do all of the functions claimed in the above claims.

Allowable Subject Matter

Claims 50 and 59-61 are allowed.

Claims 55,56,64 and 65 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
